

## □ Description

ESRD-TPA2 astronomical time switch is for realization of time functions in the systems of automatics and steering. It will calculate the sunrise and sunset according to the geographic position and time zone. Night break program can be used to turn off the output at night, set the offset time and operation times of sunrise and sunset.

There is an internal battery which can protect real time clock and all the settings when the electric power supply is off.

## □ Technical data

|                               |                                     |
|-------------------------------|-------------------------------------|
| Supply terminals              | A1-A2                               |
| Rated voltage                 | AC/DC 24-264V                       |
| Rated frequency               | 50/60Hz, 0                          |
| Power consumption             | 2W                                  |
| Supply voltage tolerance      | ±10%                                |
| Number of channels            | 2                                   |
| Program                       | astronomical                        |
| Mode of work                  | manual, automatic, holiday,         |
| Summer/winter time            | off, automatic changeover           |
| Time tolerance                | ≤1s/day at 20°C                     |
| Power reserve                 | 10 year                             |
| Data readout                  | LCD display, with back light        |
| Number of contacts            | 2 C/O                               |

| Mounting                      | TH-35 Rail(EN60715)                 |
| Dimensions                    | 90*36*65mm                          |
| Standard                      | IEC60947-1/IEC60947-2-7             |

### Maximum pilotable power

|  | 2300W |  | 2300W |  |
|--|-------|--|-------|--|

  

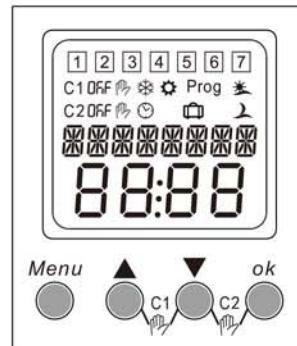

| 2300W | 2300W | 1000W | 500W | 500W |
|-------|-------|-------|------|------|

## □ Features

- Digital time switch with astronomical program
- 10 year power reserve(lithium battery).
- Sealable cover of the front panel, easy setting by 4 keys.
- Automatic summer/winter time switchover
- Back-lighted LCD display
- Holiday mode.
- 2 channels version(each channel can be assigned an individual program)
- Automatic transfer of weekdays
- 24-264VAC/DC input supply.
- Double-module, mounted on TH-35 rail.

## □ Operating instruction

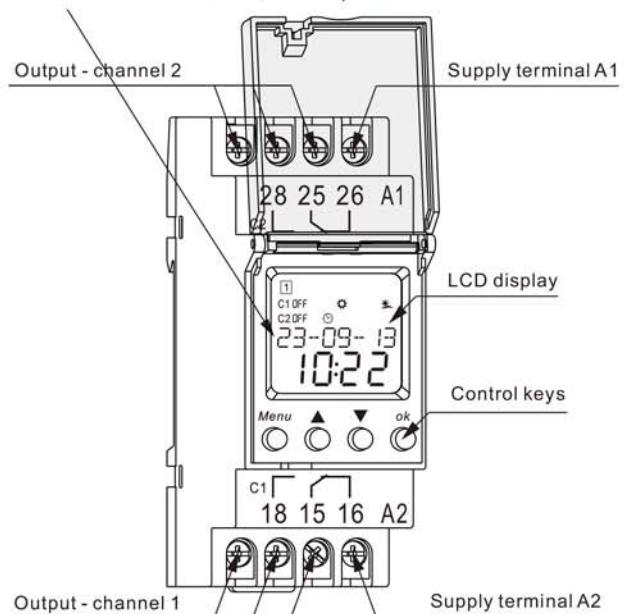

### Symbol legend

|               |   |
|---------------|---|
| 1 2 3 4 5 6 7 | — Days of the week Monday, Tuesday, ...Sunday |
| C1            | — Channel 1                                   |
| C2            | — Channel 2                                   |
| On OFF        | — Relay status                                |
| ⌚             | — Automatic mode                              |
| ⌚             | — Manual mode                                 |
| 📅             | — Holiday mode                                |
| ☀             | — Sunrise                                     |
| 🌙             | — Sunset                                      |
| ✿             | — Winter time                                 |
| ✿             | — Summer time                                 |
| Prog          | — Program setting                             |

### Keys
